Professional Summary

I'm an MCA graduate and a focused Frontend Developer specialising in modern component-based architecture using React.js. I am passionate about crafting highly responsive and intuitive user experiences, combining my strong eye for UI/UX with the practical application of JavaScript and modern CSS frameworks. I specialise in leveraging React Hooks and effective state management to build highly performant and scalable web applications. I thrive on creating clean, reusable React components and am eager to contribute my skills to a collaborative team dedicated to building impactful digital products.

Technical Skills

Front-end - HTML, CSS, Bootstrap, JavaScript
Back-end – NodeJs, MongoDB
Framework- ReactJS
Design Tools- Figma, Adobe XD
Version Control- Git, GitHub
Soft skills- Teamwork, Problem-solving, Communication, Flexibility and Time Management.

Internship Experience

MERN Stack Developer

Inetz Technologies | Aug 2025 – Nov 2025

- Developed full-stack features using the **MERN stack (MongoDB, Express.js, React.js, Node.js)**, improving application performance and usability.
- Built responsive UI components with **React.js**, and integrated backend APIs with **MongoDB** for smooth data flow.
- Collaborated with the team using **Git/GitHub**, contributing to code reviews and overall product improvements.
- Optimized front-end and back-end functionality, resolving bugs and ensuring a clean, user-friendly interface.

Full Stack Developer Python Intern

Vcodez | *March 2025 – May 2025*

- Developed web features using **React.js** for the frontend.
- Integrated **MongoDB** for backend data storage and handling.
- I worked with **Git and GitHub** on version control and team collaboration.
- Participated in UI/UX discussions to improve user experience and responsiveness.
-

Web Development

Te*achnook* | *November 2024- February 2025*

- Built dynamic web pages using **React.js**
- Designed and developed a **portfolio website** with a focus on clean UI/UX design.
- Worked with modern design tools like **Figma** to translate mock-ups into responsive code.

Projects

TaskFlow Management App

· Built a full-stack task management app using ReactJS, Node.js, and MongoDB with a responsive UI using HTML, CSS, Bootstrap, and JavaScript.

· Developed secure REST APIs with CRUD functionality and integrated JWT authentication for protected user access.

· Implemented features like task creation, editing, filtering, and status tracking, improving user productivity and workflow management.

Personal Portfolio Website

- Designed a **responsive personal portfolio** using **HTML, CSS** and showcasing projects.
- Created an initial design prototype in **Figma** before development and deployed it online.
- **Internship Experience**: Worked as a Frontend Developer Intern at **Vcodez**, contributing to real-world web projects in a team environment.

Land Price Prediction System| Python & Machine Learning (Team Project)

- Built a mini-project using machine learning algorithms to predict land prices based on user input.
- Implemented a **user login system** and integrated a simple UI for entering property details and displaying predictions.

Education:

Presidency University, Bengaluru 2023-2025
MCA (Mater's of Computer Application)

Yadava College, Madurai 2020-2023
B.com(CA) Bachelor of Computer Applications

Sriman Nayakiyar Vidya Mandir Matriculation School, Madurai Higher 2018-2020
Secondary School

Thiagarajar Model Higher Secondary School, Madurai 2017-2018
SSLC(State Board)

Language:

English Tamil
